6 konkurs IST– Linie tematyczne (SO)

Call 6 – Linie tematyczne	budżet (plan)
2.6.1 Advanced robotics	35M Eu
2.6.2 Tools for design, creativity and augmented personal capacities: Simulation, Visualisation, Interaction and Mixed Reality	30M Eu
2.6.3 Ambient Assisted Living (AAL) for the Ageing Society	35M Eu
2.6.4 Advanced search technologies for digital audio-video content	10M Eu
2.6.5 International Co-operation:	
a) Targeted research actions	
- international cooperation on digital broadcasting/mobile convergence – target country: China	6M Eu
- intrnational cooperation on grid technologies - target country: China	6M EU
- international cooperation for eGovernment and eParticipation - target countries: Western Balkans	6M Eu
- early warning systems for geo-physical hazards – target countries: Mediterrean countries, Indonesia, thailand, India, Sri-Lanka, Japan, USA, Canada	6M Eu
b) Coordination actions or specific Support actions focused on identifying constituencies and potentialities for deeper strategic cooperation	6M Eu

Projekt Ideal-ist

- Zadaniem projektu Ideal-IST jest **pomoc w poszukiwaniu partnerów do projektów europejskich w ramach IST w 6PR.**
- Projekt Ideal-IST wychodzi temu naprzeciw poprzez internetowy mechanizm "Partner Search", organizację spotkań brokerskich i innych imprez, które stwarzają szanse zawiązania międzynarodowych konsorcjów.

Idealist

The IST Partner Search Network

Ideal-ist finds partners for every type of Organisation wishing to participate in the European Union's Information Society Technologies Programme (IST). The Ideal-ist network is – co-financed by the European Commission and has 34 representatives in the 25 Member States, Candidate States and Associated States, as well as Third Countries such as Russia and Belarus.

Our Services:

Partner Search

Finding partners for your IST project idea

Your project idea will be distributed to over 55,000 international contacts interested in the IST Programme who have subscribed to their national Ideal-ist Mailing List. The service boasts 92% success rate where proposers find appropriate partners for partnership building, our network provides suitable partners within weeks - or even days – with an average of 35 responses per Partner Search!

Partner Search is a free of charge service for all IST project proposers. The service is available for all IST project proposers who are registered in the national Ideal-ist

Projekt Ideal-ist, Przykłady Partner Search strona web, projekty eHealth

Partner Search Requests

2.4.11 Integrated biomedical information for better health
Specific Targeted research Project

RU4	Development of the pre-clinic biomedical expert system for homeostasis state violations detecting and appropriate expert system tools for this task. Development both the data base to store the tests with the results and knowledge base for the diagnoses which are to enable distributed knowledge editing over the Internet. The ICECUBES will make the developed previously crystallography method of diagnostics available as a cost effective easily accessible healthcare service by automating diagnosis and deploy it on INTERNET as a telemedicine concept.
IT138	Creating a product capable of ameliorating the Risk Management techniques in the Health domain and capable of creating a Continuous Assistance path for the patients
DE140	The project objective is the development of a wearable device for diabetics equipped with sensors able to measure the glucose level non-invasively.
UK167	The aim of this proposal is to develop a new mobile personalised healthcare systems for CVD patients and especially with the genetically at risk individuals to provide the next generation of P-health systems with seamless mobility of cardiac prevention and managements system based on Third Generation (3G) mobile technologies.
IL164	Self contained, expendable "SensoRec" for screening children for obstructive sleep apnoea (OSA) at home

Partner Search Requests

2.4.13 Strengthening the Integration of the ICT research effort in an Enlarged Europe
Specific Targeted research Project

PT8	e-Health systems and services focusing on integrated health information systems, intelligent environment for health professionals and on-line services for patients and citizens
IT137	Integration in a single platform an information system able to manage and monitor all the socio-sanitary needs expressed by the citizens and all the activities preformed by the socio-sanitary operators that work on the territory (nurses, doctors, social workers, physiotherapists, etc.).
TR7	Business model development to integrate product design (B2B domain) and product planning (ERP domain) based on the cultural features through CRM activities.
PT9	The main goal of the project is the conception of a framework that extends existing concepts for collaborative e-Business with a variety of innovative capabilities for distributed business intelligence and business process management.
LT3	Research of getting refined information from unstructured and semi structured uncertain data. Development of integrated uncertain data models and processes targeted to complex e-services systems
LT4	Developing of Enterprise Application Integration (EAI) methodology for creating of Application Bus (AB)for SME. Developing of standards and protocols for getting data processing services from AB.
GR38	The purpose of the "Virtual School" project is to provide a complete set of tools supporting the evolution of schools towards the knowledge society. Based on the results of several successful IST projects," Virtual School" will develop a very

Priorytet IST w 7 Programie Ramowym – wiadomości wstępne

- IST > ICT (Information and Communication Technologies)

Cel priorytetu – wspomóc tworzenie Europejskiej Przestrzeni Badawczej (ERA) i zapewnić Europie pozycję lidera w dziedzinie tworzenia i użytkowania technologii informacyjno-komunikacyjnych

Główne kierunki działania priorytetu (kierunki badawcze, badania fazy wstępnej, tworzenie nowych technologii:

- nano-electronics, photonics and integrated micro/nano-systems
- ubiquitous and unlimited capacity communication networks
- embedded systems, computing and sensing control
- software, grids, security and dependability
- knowledge, cognitive and learning systems
- simulation, visualization, interaction and mixed realities
- new perspectives in ICT drawing on other science and technology disciplines (including feedback from physics, biotechnologies, materials- and life-sciences etc.)

Priorytet IST w 7 Programie Ramowym – wiadomości wstępne (draft)

■ Integracja technologii:

- **Personal environments:** personal communication and computing devices, accessories, wearables, implants; their interfaces and interconnections to services and resources
- Home environments: communication, monitoring, control, assistance; seamless interoperability and use of all devices; interactive digital content and services
- **Robotic systems:** advanced autonomous systems; cognition, control, action skills, natural interaction; miniaturisation, humanoid technologies
- **Intelligent infrastructures:** tools making infrastructures that are critical to everyday life more efficient and user friendly, easier to adapt and maintain, more robust to usage and resistant to failures

Priorytet IST w 7 Programie Ramowym – wiadomości wstępne (draft)

Badania stosowane, aplikacje:

1) ICT meeting societal challenges:

- Health care provision, early diagnosis, treatment and personalization
- Assistive technologies for elderly and disabled people
- Risk management technologies
- Technologies for eGovernment

2) ICT for content, creativity and personal development:

- new media paradigms and forms of content
- technology enhanced learning
- ICT based systems enabling access to digital cultural and scientific resources
- open development platforms for software and services

3) ICT supporting business and industry:

- new forms of dynamic networked co-operative business process, optimized work organization and collaborative work environments
- manufacturing

Inicjatywy IST KPK 6PR

■ Platformy Technologiczne:

1. Nowa Platforma Technologiczna „Usług mobilnych i telefonii bezprzewodowej”
Członkowie: Polska Izba Informatyki i Telekomunikacji, Logotec Engineering, Multis, Computerland, Siemens Polska, KPK 6PR

■ Projekty szkoleniowo-sieciowe/współpracy międzynarodowej

1. PRO_NMS –szkolenia, działania brokerskie, tworzenie sieci współpracy w różnych obszarach IST, bazy danych-kontakty

2. ATVN_EU_GP – wybór tzw. Best Practices (najlepsze projekty i osiągnięcia R&D w krajach NMS i Ukrainie), szkolenia, działania brokerskie, bazy danych-kontakty

3. Ideal-IST – poszukiwanie partnerów do konsorcjów projektowych IST w 6PR, mechanizm Partner Search, działania brokerskie
